RAINBOW CITY

# MS4 ANNUAL REPORT

April 1, 2024 - March 31, 2025

Prepared by
S&ME, Inc.

May 30, 2025

City of Rainbow City
3700 Rainbow Drive
Rainbow City, Alabama 35906

Attention: Mayor Joe Taylor

Reference: **Annual Report: April 1, 2024 to March 31, 2025**
**Rainbow City MS4**
Rainbow City, Etowah County, Alabama
S&ME Project No. 24820156D
NPDES Permit No. ALR040056

Dear Mr. Taylor:

S&ME has prepared the attached Annual Report for the Rainbow City Phase II Small Municipal Separate Storm Sewer System in accordance with S&ME Proposal No. 24820156D, dated November 15, 2024, and authorized on December 10, 2025. The Annual Report covers the April 1, 2024 to March 31, 2025 reporting period.

S&ME appreciates the opportunity to provide our services to Rainbow City. Should you have questions concerning this report, or if additional information is required, please contact the undersigned.

Sincerely,

**S&ME, Inc.**

Sarah L. Yeldell, P.E.
Project Manager

Deborah J. Jones, P.E.
Senior Engineer

# 1.0 Introduction

S&ME, Inc. has prepared this Annual Report for the Rainbow City, Alabama Urbanized Area Phase II Small Municipal Separate Storm Sewer System for the April 1, 2024 through March 31, 2025 reporting period. Our work was performed in general accordance with S&ME Proposal No. 24820156D, dated November 15, 2024 and authorized on December 10, 2024.

The Annual Report is required by Part VI of the Alabama Department of Environmental Management (ADEM) National Pollutant Discharge Elimination System (NPDES) General Permit ALR040000 for discharges from regulated small municipal separate storm sewer systems (MS4).

## 1.1 Gadsden, Alabama Urbanized Area

The Storm Water Phase II Final Rule issued by the United States Environmental Protection Agency (USEPA) in 1999 required nationwide coverage of all operators of small MS4s located within the boundaries of an "urbanized area" as defined by the latest decennial Census. Based on the results of the 2010 census, the Bureau of the Census designated the *Gadsden, Alabama Urbanized Area* to include the City of Attalla, the City of Gadsden, the City of Glencoe, the City of Hokes Bluff, City of Rainbow City, the City of Southside, and portions of unincorporated Etowah County.

In March 2022, the Bureau of the Census discontinued the practice of defining "urbanized areas." On June 7, 2023, USEPA issued a final rule clarifying the designation criteria for small MS4s. The rule replaced the term "urbanized area" in the Phase II regulations with the phrase "urban areas with a population of at least 50,000" to assist in identifying new MS4s. In December 2023, revised maps showing the 2020 urban area boundaries were released; however, ADEM has not provided guidance on the application of the 2020 maps in determining boundaries of existing MS4s. As a result, revised MS4 boundaries based on the 2020 Census were not available during the April 1, 2024 to March 31, 2025 reporting period.

A map outlining the approximate boundary of the 2010 *Gadsden, Alabama Urbanized Area* is included in **Appendix A** as **Figure 1**.

## 1.2 Permit History

The City of Attalla, the City of Gadsden, the City of Glencoe, the City of Hokes Bluff, the City of Rainbow City, the City of Southside, and Etowah County initially applied for and received a NPDES MS4 Phase II General Permit from ADEM in 2003, with the seven entities as co-permittees under authorization number ALR040009. The five-year permit expired on March 9, 2008. A Notice of Intent for renewal of the permit was submitted 180 days prior to expiration and permit coverage was administratively continued until the re-issuance of the MS4 Phase II General Permit with an effective date of February 1, 2011.

The 2011 permit expired on February 1, 2016. A Notice of Intent for renewal of the permit was submitted by each entity 180 days prior to expiration; therefore, the permit coverage was extended until the re-issuance of the MS4 Phase II General Permit in September. To assist in compliance tracking, the Gadsden-Etowah MS4 entities were

each issued a separate permit, although the entities agreed to continue under a joint SWMPP and monitoring plan. The Ranbow City MS4 was authorized to discharge under authorization number ALR040056 with an effective date of October 1, 2016.

The 2016 permit expired on September 30, 2021. A Notice of Intent for renewal of the permit was submitted 180 days prior to expiration, and the MS4 Phase II General Permit was re-issued with an effective date of October 1, 2021. The current permit will expire on September 30, 2026. Under the new permitting system, Rainbow City was required to prepare a separate SWMPP detailing the individual actions taken by the City to comply with the 2021 permit, as well as the joint activities shared with the remaining Gadsden-Etowah MS4 entities.

A copy of the NPDES General Permit is included in the 2025 SWMPP.

## 1.3 Storm Sewer System

A Municipal Separate Storm Sewer System (MS4) is defined by 40 CFR Part 122.26(b)(8) to be a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is:

(i) Owned or operated by a State, city, town, borough, county, parish, district, association, or other public body (created by or pursuant to State law) having jurisdiction over disposal of sewage, industrial wastes, storm water, or other wastes, including special districts under State law such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of the CWA that discharges to waters of the United States;

(ii) Designed or used for collecting or conveying storm water;

(iii) Not a combined sewer; and,

(iv) Not part of a Publicly Owned Treatment Works (POTW) as defined at 40 CFR 122.2.

## 1.4 Rainbow City MS4 Area

The Rainbow City Municipal Separate Storm Sewer System (Rainbow City MS4) is defined as the area within both the city limits and the urbanized area boundary. As defined by the 2010 Census, the *Gadsden, Alabama Urbanized Area* encompasses approximately 74.8 square miles. The Rainbow City MS4 comprises approximately 7.6 square miles (10.2%) of the 2010 *Gadsden, Alabama Urbanized Area*. Approximately 29.7% of the city is located within the MS4 boundary. A map depicting the Rainbow City urbanized area and city limits is located in **Appendix A** as **Figure 2**.

### *1.4.1 Hydrologic Units in the Urbanized Area*

Neely Henry Lake (Coosa River) is the primary receiving water for the Rainbow City MS4. Hydrologic Hierarchy, Watersheds, and Subwatersheds are provided in the tables below.

### Table 1-1 Hydrologic Hierarchy

| Type | Code | Name |
|---|---|---|
| REGION | 03 | South Atlantic-Gulf |
| SUBREGION | 03-15 | Alabama River Basin |
| BASIN | 0315-01 | Coosa-Tallapoosa: Above the confluence of and including the Coosa and Tallapoosa River Basins |
| SUBBASIN | 031501-06 | Middle Coosa |

### Table 1-2 Watersheds in the MS4 Area

| Watershed | 10 Digit HUC |
|---|---|
| Big Wills Creek | 03150106-01 |
| Big Canoe Creek-Coosa River | 03150106-03 |

### Table 1-3 Subwatersheds in the Rainbow City MS4 Area

| Subwatershed | 12 Digit HUC | Total Area (Acres) | Area within Rainbow City MS4 (Acres) |
|---|---|---|---|
| Horton Creek | 03150106-01-08 | 16,902 | 3,225 |
| Lower Big Canoe Creek | 03150106-03-06 | 33,307 | 913 |
| Coosa River-H. Neely Henry Lake | 03150106-03-09 | 46,439 | 726 |

A map showing the HUC12 subwatersheds in relation to the Rainbow City MS4 boundary is included in the 2025 SWMPP.

## 1.5 Responsible Party

The **Building Department** is responsible for the coordination and implementation of the Storm Water Management Program Plan. Coordination between City departments is established in each section of the SWMPP.

The **Storm Water Steering Committee** is responsible for the implementation of the monitoring plan.

## 1.6 Annual Report Components

Part IV of the NPDES General Permit requires that the Rainbow City MS4 prepare and submit annual reports to the ADEM each year by May 31. The Annual Report must cover the year prior to the submittal date (April 1 through March 31) and is required to include the following:

1. Contacts and responsible parties who had input to and are responsible for the preparation of the annual report

2. Overall evaluation of the SWMPP-developments and progress on the following:
    a. Major accomplishments
    b. Overall program strengths/weaknesses
    c. Future direction of the program
    d. Overall determination of the effectiveness of the SWMPP considering water quality/watershed improvements
    e. Measurable goals that were not performed and reasons why the goals were not accomplished
    f. Evaluation of the monitoring data

3. A narrative report of all minimum storm water control measures referenced in the permit to include the following:
    a. Minimum control measures completed and in progress
    b. Assessment of the controls
    c. Discussion of proposed BMP revisions or any identified measurable goals that apply to the minimum storm water control measures

4. Summary table of the storm water controls that are planned/scheduled for the next reporting cycle

5. Results of information collected and analyzed during the reporting period including monitoring data used to assess the success of the program at reducing the discharge of pollutants to the Maximum Extent Practical (MEP)

6. Notice of reliance on another entity to satisfy some of your permit obligations

7. Results of the evaluation to determine whether discharges from any part of the MS4 contribute directly or indirectly to a waterbody that is included on the latest 303(d) list or for which a TMDL has been established or approved by EPA

8. All monitoring results collected during the reporting period

This Annual Report covers activities performed during the April 1, 2024 to March 31, 2025 reporting period under the SWMPP dated February 2025.

## 2.0 Contacts List

***Reference Part VI.B.1***

Part VI.B.1 of the NPDES Permit requires that the City of Rainbow City provide a list of contacts and responsible parties involved in the preparation of the Annual Report. The following personnel were directly responsible for the preparation of the 2024-2025 Annual Report:

**Mr. Joel Garmon**
Building Official
3700 Rainbow Drive
Rainbow City, AL 35906
256-413-1230
jgarmon@rbcalabama.com

**Mr. John Jayroe**
Deputy Building Official
3700 Rainbow Drive
Rainbow City, AL 35906
256-413-1240
jjayroe@rbcalabama.com

**Ms. Sarah Yeldell, P.E.**
Consultant
S&ME, Inc.
360D Quality Circle NW, Suite 450
Huntsville, Alabama 35806
256-837-8882
syeldell@smeinc.com

**Ms. Emily Kennedy**
Consultant
S&ME, Inc.
360D Quality Circle NW, Suite 450
Huntsville, Alabama 35806
256-837-8882
ekennedy@smeinc.com

Questions concerning the 2024-2025 Annual Report should be directed to the **Building Department**.

# 3.0 Evaluation of Water Quality Concerns

***Reference Part VI.B.7***

Section 303(d) of the Clean Water Act (CWA), as amended by the Water Quality Act of 1987, and EPA's Water Quality Planning and Management Regulations (40CFR130) require states to identify waterbodies not in compliance with the water quality standards applicable to their designated use classifications. The identified waters are prioritized based on severity of the pollution. Section 303(d) then requires that total maximum daily loads (TMDLs) be determined for all pollutants causing violation of applicable water quality standards in each identified segment. The TMDL process establishes the allowable loading of pollutants, or other quantifiable parameters for a waterbody, based on the relationship between pollution sources and in-stream water quality conditions.

Maps showing the impaired waterbodies and watersheds in relation to the Rainbow City MS4 are provided in **Appendix A** as **Figures 3 and 4**.

## *3.1.1 Impaired Waterbodies Within the MS4*

Two impaired waterbodies are located within the Rainbow City MS4 boundary.

**Table 3-1 Impaired Waterbodies within the MS4**

| Waterbody | Impaired Segment | Type | Causes | Use |
|---|---|---|---|---|
| Big Wills Creek Embayment (Neely Henry Lake) | AL03150106-0108-111 | 303(d) (2018) | Nutrients | F&W |
| Coosa River (Neely Henry Lake) | AL03150106-0309-102 | TMDL (2008) | Nutrients<br>pH<br>Organic Enrichment (CBOD, NBOD) | F&W |

## *3.1.2 Impaired Watersheds Intersecting the MS4*

In addition to the impaired waterbodies, the Rainbow City MS4 encompasses portions of watersheds for the following impaired waterbodies:

**Table 3-2 Portions of Impaired Watersheds within the MS4**

| Watershed | Impaired Segment | Type | Causes | Use |
|---|---|---|---|---|
| Big Wills Creek Embayment (Neely Henry Lake) | AL03150106-0108-111 | 303(d) (2018) | Nutrients | F&W |

| Watershed | Impaired Segment | Type | Causes | Use |
|---|---|---|---|---|
| Coosa River (Neely Henry Lake) | AL03150106-0309-102 | TMDL (2008) | Nutrients<br>pH<br>Organic Enrichment (CBOD, NBOD) | F&W |
| Big Canoe Creek Embayment (Neely Henry Lake) | AL03150106-0306-111 | TMDL (2008) | Nutrients<br>pH<br>Organic Enrichment (CBOD, NBOD) | S<br>F&W |

### *3.1.3 Neely Henry Lake TMDL*

In 2008, the EPA approved TMDLs for Neely Henry Lake related to Nutrients (Total Phosphorous), pH, and Organic Enrichment/Dissolved Oxygen. The Rainbow City MS4 directly and indirectly discharges to Neely Henry Lake; therefore, **the Rainbow City MS4 is required to achieve a 30% reduction in Total Phosphorus discharge loading**.

Sources of nutrient and organic enrichment from non-point sources within the Coosa River watershed include:

- Runoff from pastures
- Runoff from animal operations
- Direct discharge to streams due to cattle
- Improper land application of animal waste
- Failing septic systems
- Urban runoff

Point source contributors of storm water pollution within the Coosa River watershed include:

- Discharge from wastewater treatment plants
- Discharge from industrial operations

Part IV.D of the NPDES General Permit requires that the City implement Best Management Practices (BMPs) and control measures specifically targeted to achieve the waste load allocations prescribed in the TMDL. The City must also implement a monitoring program to document that the waste load allocations prescribed in the TMDL are being achieved.

# 4.0 Overall Program Evaluation

***Reference Part VI.B.2***

## 4.1 Major Accomplishments

During the 2024-2025 reporting period, the City completed 66 out of 78 planned strategies, as well as two additional strategies. The number of completed activities (66) demonstrates the City's commitment to implement the SWMPP and Phase II Permit.

**1. Updated and revised the 2022 Storm Water Management Program Plan (SWMPP)**

In August 2024, the EPA approved TMDLs related to E. coli for two segments of Big Wills Creek and four tributaries to Big Wills Creek. Although the Rainbow City MS4 does not discharge to Big Wills Creek, the City partners with the surrounding municipalities to perform watershed monitoring under a joint monitoring program. In response to the issuance of the new TMDLs, the Rainbow City MS4 SWMPP was revised to include the 2025 Etowah Monitoring Partnership Wet Weather Monitoring Program.

**2. Performed construction inspections to identify and address deficient sites**

The City performed monthly inspections at active construction sites. Sites with noted deficiencies were not identified during the 2024-2025 reporting period. The City conducted 220 inspections for 23 active construction sites during the 2024-2025 reporting period.

**3. Maintained the recycling program and supported the Southside recycling program**

The City maintained two drop-off recycling locations and distributed recycling bins to local businesses during the reporting period. Approximately 339 tons of recyclable material was collected, helping to reduce the amount of litter dumped within the MS4.

The City also entered into an agreement with the City of Southside to support the Southside recycling program by removing and recycling cardboard collected in the new Southside recycling trailers.

**4. Performed outfall inspections and addressed a suspect illicit discharge**

The City inspected 92 outfall locations during the reporting period. Fifteen outfalls were missing and were removed from the outfall inventory. Dry weather flow was observed in one outfall, and field screening for temperature, ammonia, and pH was conducted in accordance with the IDDE program. Field screening results did not indicate any suspected illicit discharges.

## 4.2 Overall Programs Strengths and Weaknesses

The City continues to evaluate the processes and procedures in which it accomplishes the objectives of the SWMPP. Their strengths and weaknesses remain very similar as in past years.

The main strength of the Rainbow City program is the completeness of the City's outfall inventory and MS4 map. By surveying system features and conducting a full stream walking program, the City was able to identify a large number of outfalls. The inventory has been maintained through annual dry weather inspections and observations. The inventory and map are crucial to understanding how runoff from the MS4 is conveyed to the waterbodies, and the types of outfalls identified may help target public education efforts regarding common pollutants.

The main weakness of the program is the small number of municipal staff that can be dedicated exclusively to the performance of the duties required by the Phase II Permit. This limits their availability to participate in activities throughout the City related to the SWMPP. The City currently employs a Building Official as the primary executive of the storm water program. The Building Official assists with the storm water program responsibilities; the program duties are handled by two individuals. The City does not currently have the ability to expand the Department for the storm water program; therefore, this weakness is expected to remain for several years.

## 4.3 Future Direction of the Program

During the upcoming reporting period, the City will increase their efforts to promote educational materials and actively solicit public input by using resources such as social media to increase public engagement with the MS4 program.

## 4.4 Overall Effectiveness of the SWMPP

Rainbow City is proud of their efforts to achieve the objectives of the SWMPP. Based on this evaluation, the 2025 SWMPP appears to have been effective in meeting the objectives and requirements of the 2021 Phase II Permit.

## 4.5 Measurable Goals Not Performed

The City maintained the stormwater management webpage, but did not add any new educational material to the website.

Although the City created three social media posts regarding storm water education, the City did not distribute storm water messaging or educational materials on social media every quarter.

Although the City provided the 2023-2024 Annual Report and 2025 SWMPP on the stormwater management webpage and the City's social media accounts, an announcement was not posted on the City's digital sign.

The City did not promote a Water Quality Awareness Week during the reporting period.

One City employee participated in the 2025 *Etowah Country Water Festival*, but the City did not promote the festival.

Although the City maintained a public complaint reporting form on the stormwater management webpage, they did not promote the form or reporting method on social media.

The City did not provide educational materials regarding the identification and reporting of potential illicit discharges on the City's social media pages.

The City did not develop a written Standard Operating Procedure (SOP) for municipal vehicle fueling.

# 5.0 Storm Water Monitoring Data Evaluation

***Reference Part VI.B.5 and 8***

## 5.1 Rationale Statement

As discussed in Section 3.0, the Rainbow City MS4 currently discharges to impaired waterbodies for which a TMDL has been approved. Part V.A of the 2021 MS4 Permit requires that the SWMPP include a monitoring plan to assess the effectiveness of the BMPs in achieving the waste load reductions/allocations outlined in the TMDL.

The intent of the monitoring program is to evaluate the effectiveness of the City's BMPs in achieving the required phosphorous reduction as established in the TMDL and to generally evaluate overall water quality. Where deviations are documented and/or expected, the collected monitoring data will be used to determine the extent and cause of the pollutant of concern.

The 2025 *Etowah Monitoring Partnership Wet Weather Monitoring Program* is included as Appendix C of the SWMPP dated February 2025. The program details monitoring parameters, monitoring locations, field documentation, and sampling procedures.

## 5.2 Monitoring Events

Beginning in January 2013, S&ME was retained by the Gadsden-Etowah Storm Water Steering Committee to collect the required quarterly surface water samples and provide analyses of the sampling events. On March 24, 2015, the cities of Attalla, Gadsden, Glencoe, Hokes Bluff, Rainbow City, and Southside and Etowah County entered into a Cooperative Agreement to jointly perform the quarterly monitoring.

Beginning in October 2023, the City of Gadsden elected to separate from the joint monitoring agreement and perform their own monitoring. The cities of Attalla, Glencoe, Hokes Bluff, Rainbow City, and Southside and Etowah County have continued to jointly perform the quarterly wet-weather monitoring. Monitoring events conducted since October 2023 do not include monitoring points CO 15, GD 6, GD 7, GD 8, or GD 9.

**Table 5-1 Monitoring Events to Date**

| MS4 Reporting Period | Monitoring Event | Date(s) Monitoring Conducted |
|---|---|---|
| April 1, 2012 – March 31, 2013 | 2013 Q1 | March 12 & 13, 2013 |
| April 1, 2013 – March 31, 2014 | 2013 Q2 | May 8 & 20, 2013 |
| | 2013 Q3 | September 23, 2013 |
| | 2013 Q4 | December 10, 2013 |
| | 2014 Q1 | February 6, 2014 |

| MS4 Reporting Period | Monitoring Event | Date(s) Monitoring Conducted |
|---|---|---|
| April 1, 2014 – March 31, 2015 | 2014 Q2 | June 26, 2014 |
| | 2014 Q3 | September 30, 2014 |
| | 2014 Q4 | November 19, 2014 |
| | 2015 Q1 | March 23, 2015 |
| April 1, 2015 – March 31, 2016 | 2015 Q2 | April 22, 2015 |
| | 2015 Q3 | September 30, 2015 |
| | 2015 Q4 | November 19, 2015 |
| | 2016 Q1 | March 15, 2016 |
| April 1, 2016 – March 31, 2017 | 2016 Q2 | June 29, 2016 |
| | 2016 Q3 | August 9, 2016 |
| | 2016 Q4 | December 7, 2016 |
| | 2017 Q1 | March 2, 2017 |
| April 1, 2017 – March 31, 2018 | 2017 Q2 | June 21, 29, 30 and July 5, 2017 |
| | 2017 Q3 | August 16-17, 2017 |
| | 2017 Q4 | October 25-26, 2017 |
| | 2018 Q1 | March 27-28, 2018 |
| April 1, 2018 – March 31, 2019 | 2018 Q2 | June 26 and 29, 2018 |
| | 2018 Q3 | August 1-2, 2018 |
| | 2018 Q4 | December 10-11, 2018 |
| | 2019 Q1 | April 15 and 17, 2019 |
| April 1, 2019 – March 31, 2020 | 2019 Q2 | June 11-12, 2019 |
| | 2019 Q3 | August 27-28, 2019 |

| | 2024 Q3 | September 16, 2024 |
| | 2024 Q4 | December 11, 2024 |
| | 2025 Q1 | February 18, 2025 |

A monitoring report was issued to the members of the Steering Committee following each monitoring event. Copies of the reports for the monitoring events conducted during the April 1, 2024 to March 31, 2025 reporting period are provided in **Appendix C**.

## 5.3 Addition and Removal of Monitoring Points

No monitoring points were added or removed from the program during the April 1, 2024 to March 31, 2025 reporting period.

## 5.4 Additional Parameters

In August 2024, the EPA approved TMDLs for E. coli for two segments of Big Wills Creek and four tributaries to Big Wills Creek. One of these segments receives discharges from the Attalla MS4 and Etowah County MS4. In February 2025, the wet-weather monitoring program was revised to add pathogens monitoring in Big Wills Creek as part of the monitoring program. The City's SWMPP was updated in February 2025 to include the revised 2025 *Etowah Monitoring Partnership Wet Weather Monitoring Program*. Pathogens monitoring was first conducted during the February 18, 2025 monitoring event.

## 5.5 Statistical Analysis

A total of 49 quarterly monitoring events have been conducted since the Monitoring Program was first implemented in March of 2013. Charts 1 through 10 in **Appendix B** summarize the analytical data collected during these monitoring events.

Statistical analysis was performed on the cumulative monitoring data to evaluate trends and to determine whether there has been a statistically significant increase (SSI) of concentrations between specific monitoring points.

For the current statistical analysis, S&ME performed the statistical evaluation using the ChemStat Version 6.5 software produced by Starpoint Software. The appropriate statistical procedure used in this evaluation was determined by the characteristics of the data set. The approach used to determine the appropriate statistical evaluation and the results of the statistical evaluation are summarized in the following paragraphs.

Specific monitoring points were chosen for comparison based on their location within the MS4 area respective to other monitoring point locations and the trend of collected data. Detailed results are given in **Appendix B**.

### *5.5.1 Approach to Statistical Analysis*

Essentially, there are two sets of data to be compared during this statistical evaluation. Sen's non-parametric estimator of slope is a method of estimating the slope (change in concentration over time) of the data. Because this method is non-parametric, it is suitable for high percentage of non-detects and is not significantly affected by outliers. The result indicates whether there is an upward, downward, or no trend in the concentration data.

The Wilcoxon rank-sum test evaluates potential differences in the medians of two populations. The Wilcoxon rank-sum test can be used to compare a single data group against another data group. In this evaluation, we compared the specific monitoring points to determine if a statistically significant difference is present in a monitoring point using a statistical significance value (alpha) of 0.01. If a statistically significant difference was observed, we then compared the median values of each point to evaluate whether a point had a statistically significant increase (SSI) over the background point.

The following laboratory parameters were evaluated in the statistical analysis:

- Total Suspended Solids (TSS)
- Total Phosphorous
- Orthophosphate
- Nitrate-Nitrite
- Total Kjeldahl Nitrogen (TKN)

E. coli was not included in the 2024-2025 statistical evaluation due to a lack of data.

### *5.5.2 Change in Concentration Over Time*

Table 5-2 below lists the points and parameters for which a trend was indicated by the Sen's Slope Analysis. The remaining assessed parameters have no trend in the slope.

**Table 5-2 Summary of Results of Slope Analysis**

| Point Analyzed | Parameter | Trend |
|---|---|---|
| SME 7 | Ortho-phosphate | Upward |
| SME 7 | Nitrate-nitrite | Upward |
| SS 13 | TKN | Upward |

| Point Analyzed | Parameter | Trend |
|---|---|---|
| SME 4 | TKN | Upward |
| SME 5 | TKN | Upward |
| GD 12 | TSS | Downward |

### *5.5.3 Statistically Significant Increases*

Table 5-3 below reports the statistical evaluation for statistically significant increases (SSIs) for a summary of parameters and monitoring point comparisons.

**Table 5-3 Summary of Results of SSIs**

| Point Analyzed | Point of Comparison | SSI Identified | Parameters w/ SSI |
|---|---|---|---|
| AT 5 | SME 7 | No | - |
| GD 5 | SME 4 | No | - |
| GD 12 | SME 4 | No | - |
| HB 3 | SME 4 | Yes | TSS |
| RC 2 | SME 1 | No | - |
| RC 2 | SME 4 | No | - |
| RC 14 | SME 4 | No | - |
| SME 1 | SME 4 | Yes | Ortho-phosphate, Total Phosphorus |
| SME 1 | AT 5 | No | - |
| SME 3 | SME 4 | No | - |
| SME 5 | SME 4 | No | - |
| SME 6 | SME 4 | No | - |
| SME 6 | SME 5 | No | - |
| SME 7 | SME 4 | Yes | Nitrate-Nitrite, Ortho-phosphate, Total Phosphorus |
| SME 9 | HB 3 | No | - |
| SME 9 | SME 4 | No | - |
| SME 10 | GD 5 | Yes | TSS |
| SME 10 | SME 4 | No | - |
| SS 5 | SME 4 | No | - |
| SS 13 | SME 4 | Yes | TKN |
| SS 14 | SME 4 | Yes | TKN, Ortho-phosphate, Total Phosphorus, Nitrate-nitrite |

## 5.6 Evaluation of Monitoring Results

The results of the slope analysis indicate that, although fluctuations occur from one monitoring event to another, pollutant concentrations in the MS4 waterbodies have remained generally consistent over the past 12 years at 17 of the 22 monitoring points. The exceptions are SME 7 (Big Wills Creek), where an upward trend was observed for ortho-phosphate and nitrate-nitrite, and at SS 13 (unnamed tributary to Neely Henry Lake) where an upward trend was identified for TKN. An upwards trend for TKN was also identified at SME 4 and SME 5 (Neely Henry Lake). A downward trend was observed in GD 12 (unnamed tributary to Neely Henry Lake) for TSS.

### *5.6.1 Monitoring Points SME 4, SME 5, and SME 6*

Monitoring points SME 4, 5, and 6 were sited to assess water quality in the Coosa River where it enters the urbanized area, in the central portion of the urbanized area, and where it leaves the urbanized area, respectively, as shown in Diagram 1. The points were first sampled in December 2020, and a total of fourteen monitoring events have been completed since, with the exception of SME 4 which was not sampled in September 2021.

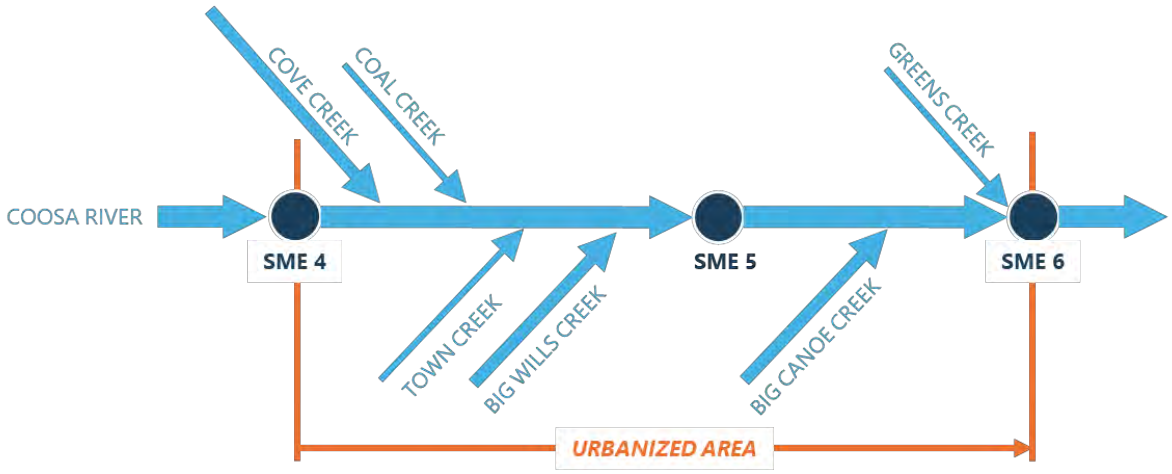

**Diagram 1. Coosa River Monitoring Points**

Over the past eighteen monitoring events, turbidity increased between monitoring points SME 4 and SME 6 thirteen times and decreased four times, with one event not sampled. Total nitrogen increased in ten of the seventeen monitoring events and TSS increased in fourteen of the seventeen events. Ortho-phosphate was detected in three events at monitoring points SME 4 and SME 5 and was detected twice at SME 6. Total phosphorous increased in six of the seventeen events.

The upwards trends identified for TKN in SME 4 and SME 5 indicate that TKN is increasing in the Coosa River upstream of the urbanized area; however, as shown in Table 5-3, no SSIs were observed when the downstream Coosa River points were compared to the upstream river points. **These results indicate that no statistically significant increase in pollutants is occurring in the Coosa River due to runoff from the urbanized area.**

The Attalla, Glencoe, Hokes Bluff, Rainbow City, Southside, and Etowah County MS4s will continue to monitor points SME 4, SME 5, and SME 6 during the April 1, 2025 to March 31, 2026 reporting period.

### *5.6.2 Monitoring Points AT 5 and SME 7*

Monitoring point SME 7 is located in Big Wills Creek, upstream of monitoring point AT 5, as shown in Diagram 2. Monitoring point AT 5 is located in Big Wills Creek, downstream of its confluence with Little Wills Creek. Monitoring point SME 7 was first sampled in December 2020, and a total of eighteen monitoring events have been completed.

**Diagram 2. Big Wills Creek Monitoring Points**

As previously discussed, based on the slope analysis, an upward trend was observed at SME 7 for ortho-phosphate and nitrate-nitrite; however, no corresponding upward trend was observed downstream at AT 5. Nitrate-nitrite decreased between SME 7 and AT 5 in fourteen out of the last eighteen monitoring events, ortho-phosphate decreased thirteen out of the last eighteen monitoring events, and total phosphorus decreased between the two points in fourteen of the last eighteen events.

As shown in Table 5-3, no SSIs were observed when AT 5 was compared to SME 7 upstream, indicating that an increase in pollutant concentrations is not occurring as Big Wills Creek passes through the Attalla and Etowah County MS4s, possibly due to dilution as other waterbodies (specifically Little Wills Creek) and runoff enter Big Wills Creek. The pollutants in Big Wills Creek are generally from outside of the MS4, and the urbanized area does not appear to be contributing additional pollution to the waterbody.

As shown in Table 5-3, SSIs for nitrate-nitrite, ortho-phosphate, and total phosphorus were noted when SME 7 was compared to the Coosa River (SME 4), indicating that the pollutant concentrations in Big Wills Creek are higher than the concentrations upstream in the Coosa; however, as previously discussed, no SSIs were observed when the downstream Coosa River points were compared to the upstream river points. **These results indicate that although Big Wills Creek is a source of pollutants to the Coosa River, the flow is not sufficient to cause an observable impact on the Coosa River.**

The Attalla, Glencoe, Hokes Bluff, Rainbow City, Southside, and Etowah County MS4s will continue to monitor points SME 7 and AT 5 during the April 1, 2025 to March 31, 2026 reporting period.

### *5.6.3 Monitoring Point SME 1*

Monitoring point SME 1 was sited to observe water quality at the location where the combined flow from Big Wills Creek, Black Creek, and Horton Creek enters the Coosa River, as shown in Diagram 3. Monitoring point AT 5 is located in Big Wills Creek, monitoring point GD 8 (which is currently monitored by the City of Gadsden) is located

in Black Creek, and monitoring point RC 2 is located in Horton Creek. The monitoring points were first sampled in March 2013, and a total of 49 monitoring events have been completed.

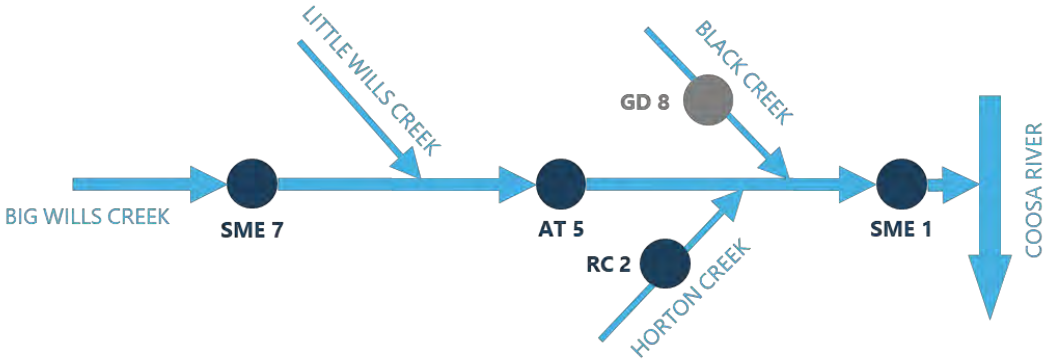

**Diagram 3. Big Wills Creek/Black Creek Embayment Monitoring Points**

Generally, nitrogen and phosphorous results at AT 5 are higher than those recorded downstream at SME 1, whereas nitrogen and phosphorous values at RC 2 are lower than those recorded at downstream SME 1. As shown in Table 5-3, no SSIs were observed when SME 1 was compared to upstream point AT 5, indicating that an increase in pollutant concentrations is not occurring before the combined flow from AT 5, GD 8, and RC 2 discharges to the Coosa River.

**These results indicate that the Big Wills Creek watershed is the primary source of nitrogen and phosphorous approaching SME 1.** A portion of the observed reduction between AT 5 and SME 1 may come from dilution as other waterbodies and runoff join Big Wills Creek. This further indicates that the urbanized area is not contributing additional pollution to the Coosa River.

The Attalla, Glencoe, Hokes Bluff, Rainbow City, Southside, and Etowah County MS4s will continue to monitor points AT 5, RC 2, and SME 1 during the April 1, 2025 to March 31, 2026 reporting period.

### *5.6.4 Monitoring Point SS 14*

Monitoring point SS 14 was sited to observe water quality in an unnamed tributary to the Coosa River in Southside, as shown in in Diagram 4. The drainage area for SS 14 includes portions of the Southside and Etowah County MS4s, as well as areas outside of the MS4 boundary. Land uses in the SS 14 drainage area include residential, commercial, recreational, and agricultural. The monitoring point was first sampled in March 2013, and a total of 49 monitoring events have been completed.

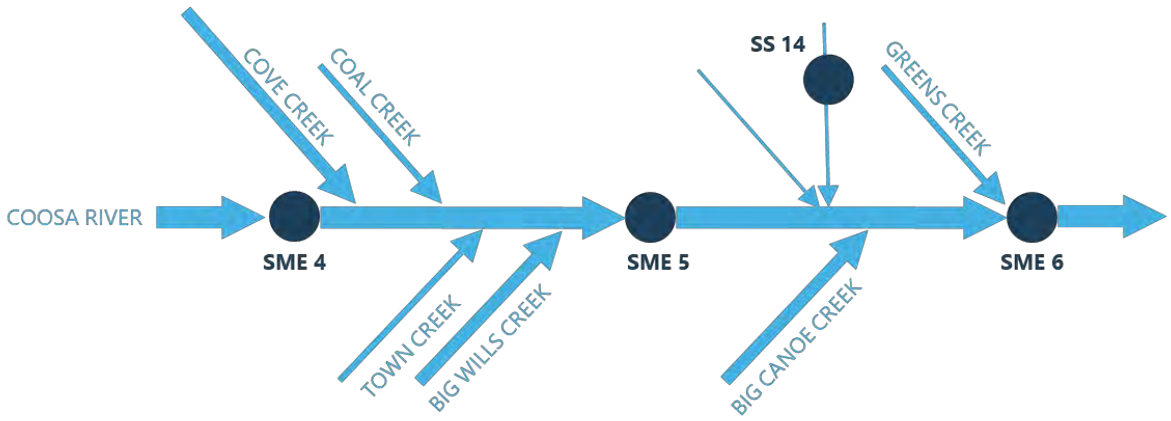

**Diagram 4. Monitoring Point SS 14**

As shown in Table 5-3, SSIs for TKN, nitrate-nitrite, ortho-phosphate, and total phosphorus were noted when point SS 14 was compared to SME 4. The monitoring results for TKN, nitrate-nitrite, ortho-phosphate, and total phosphorous at SS 14 indicate that concentrations in the unnamed tributary are higher than those observed in the river as it enters the urbanized area; however, there is no clear increase in the levels of TKN, nitrate-nitrite, phosphorus, and ortho-phosphate in the receiving water between SME 5 (Coosa River upstream of SS 14) and SME 6 (Coosa River downstream of SS 14). **These results indicate that although the unnamed tributary to the Coosa River is a source of pollutants to the Coosa River, the flow is not sufficient to cause an observable impact on the Coosa River.** Additionally, based on the results of the slope analysis, measured pollutant concentrations at SS 14 appear to have remained generally consistent over the past 12 years and are not increasing.

The Attalla, Glencoe, Hokes Bluff, Rainbow City, Southside, and Etowah County MS4s will continue to monitor points SS 14, SME 5, and SME 6 during the April 1, 2025 to March 31, 2026 monitoring period.

### *5.6.5 Monitoring Point SS 13*

An upward trend was also observed for TKN concentrations at SS 13. Monitoring point SS 13 was sited to observe water quality in an unnamed tributary to the Coosa River in Southside, as shown in Diagram 5. The drainage area for SS 13 includes portions of the Southside and Etowah County MS4s. Land uses in the SS 13 drainage area include residential, recreational, and agricultural.

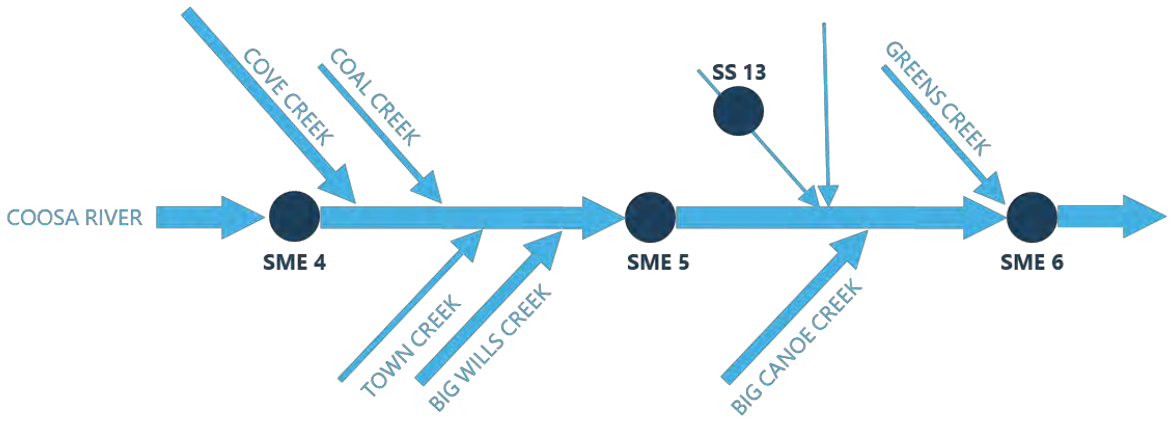

**Diagram 5. Monitoring Point SS-13**

As shown in Table 5-3, SSIs for TKN were observed at point SS 13 when compared to SME 4. This indicates that TKN concentrations in the tributary to the Coosa River are generally higher than TKN concentrations in the river as it enters the urbanized area; however, there is no clear increase in the levels of TKN in the receiving water between SME 4 (Coosa River upstream) and SME 6 (Coosa River downstream). This seems to indicate that although levels of TKN are elevated at SS 13, the flow from the associated drainage areas is not sufficient to cause a statistically significant impact on the Coosa River.

### *5.6.6 Total Suspended Solids*

With the exception of monitoring point GD 12, TSS concentrations in the MS4 waterbodies have remained generally consistent over the past 12 years. A downward trend was observed for TSS concentrations at GD 12. Monitoring point GD 12 was sited to observe water quality in an unnamed tributary to the Coosa River in Etowah County, as shown in Diagram 6. The drainage area for GD 12 includes portions of the Etowah County MS4. Land uses in the GD 12 drainage area include residential, recreational, and agricultural.

Monitoring point HB 3 was sited to observe water quality in an unnamed tributary to the Coosa River in Hokes Bluff. As shown in Table 5-3, an SSI for TSS was observed at point HB 3 when compared to SME 4. This indicates that TSS concentrations in the tributary from Hokes Bluff are generally higher than TSS concentrations in the river as it enters the urbanized area.

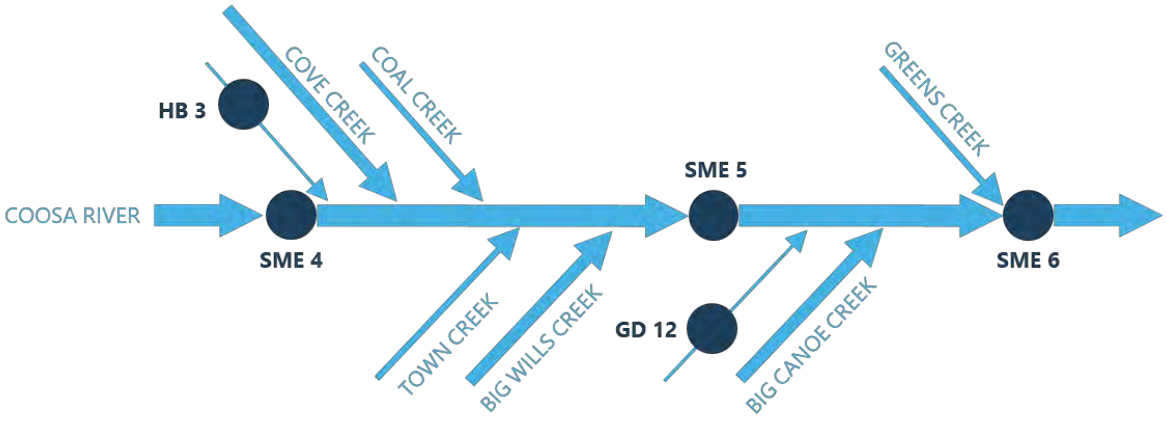

**Diagram 6. Monitoring Points HB 3 and GD 12**

Monitoring point SME 10 was sited to observe water quality in an unnamed tributary to Big Cove Creek in Hokes Bluff. Monitoring point GS 5 was sited downstream in the Cove Creek Embayment, as shown in Diagram 7. As shown in Table 5-3, an SSI for TSS was observed at monitoring point SME 10 when compared to GD 5. This indicates that TSS concentrations leaving Hokes Bluff are higher than those observed in the Cove Creek Embayment.

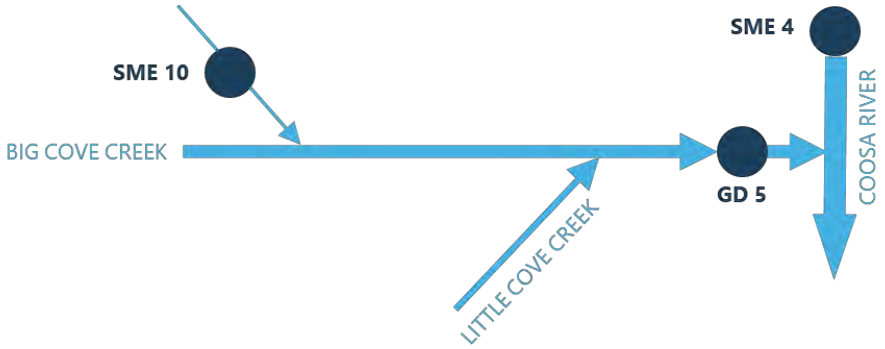

**Diagram 7. Monitoring Points SME 10 and GD 5**

There is no clear increase in the levels of TSS between SME 4 (Coosa River upstream) and SME 6 (Coosa River downstream). This seems to indicate that although levels of TSS are elevated at HB 3 and SME 10, the flow from the associated drainage areas is not sufficient to cause a statistically significant impact on the Coosa River.

## 5.7 Summary of Recommendations

The entities that comprise the Gadsden-Etowah MS4 initially took a watershed approach regarding their storm water monitoring program. This approach has allowed the entities to evaluate how the overall watershed is responding to the established BMPs and to generally evaluate water quality across the MS4. The current *Wet-Weather Monitoring Program* went into effect February 2025.

During the April 1, 2025 to March 31, 2026 reporting period, the Gadsden-Etowah MS4 entities will meet to discuss changes to the 2025 *Wet-Weather Monitoring Program*, including whether to continue the watershed approach or evaluate each MS4 separately. The current monitoring points are adequate for evaluating the watershed and the Gadsden-Etowah MS4 entities as a group; however, the existing points do not provide the density needed to evaluate each MS4 separately. If the steering committee were to elect to evaluate each MS4 independently, additional monitoring points would be required.

No changes to the current monitoring program are recommended at this time.

# 6.0 Narrative Report of Minimum Storm Water Control Measures

***Reference Part VI.B.3 and 4***

## 6.1 Public Education and Public Involvement on Storm Water Impacts

### *6.1.1 Implementation Status*

During the April 1, 2024 to March 31, 2025 reporting period, Rainbow City completed twelve (12) of the eighteen (18) Public Education and Public Involvement strategies identified in the previous Annual Report, the 2022 SWMPP, and the 2025 SWMPP.

The City did not complete one (1) strategy:

- The City did not promote Water Quality Awareness Week (Strategy 11).

The City partially completed five (5) strategies:

- The City maintained the storm water webpage, but no new educational materials were added (Strategy 1).
- The City provided hardcopy education materials at the library and at City Hall and created two social media posts. However, the City did not use the Rainbow City social media accounts to distribute storm water educational material every quarter (Strategy 2).
- The City sought public input by posting the 2023-2024 Annual Report on social media; however, an announcement regarding the availability of the Annual Report was not posted on the digital sign (Strategy 7).
- One City employee participated in the 2024 *Etowah County Water Festival*, but the City did not promote the festival (Strategy 12).
- The City maintained a public reporting system on the webpage, but did not promote it on the City's social media (Strategy 13).

The County also completed two additional strategies beyond those proposed in the previous Annual Report and the 2025 SWMPP.

- The City continued to support the Southside recycling program by removing and recycling cardboard collected in the new Southside recycling trailers (Strategy 19).
- The City coordinated and participated in a storm water educational activity for school aged children (Strategy 20).

A table identifying each Public Education and Public Involvement strategy planned for the 2024-2025 reporting period, a description of actions taken by the City of Rainbow City, and a description of activities planned for the next reporting period is provided at the end of this section. Supporting documentation is included in **Appendix D.**

### 6.1.2 *Proposed Activities for the April 1, 2025 to March 31, 2026 Reporting Period*

The City will implement the activities listed in the 2025 SWMPP and in Table 6-1 as part of their Public Education and Public Involvement Program during the 2025-2026 reporting period. The City will evaluate the success of the program to aid in preparing the required Annual Report based on the evaluation criteria established for each strategy.

### 6.1.3 *Assessment of Controls*

The strategies enacted during the reporting period appear to be effective in meeting the objectives of the Public Education and Public Involvement Control Measure as outlined in the 2021 permit. The strategies are adequate to educate the community about the impacts of storm water runoff, identify steps the community can take to help reduce pollutants, and provide opportunities for public involvement.

### 6.1.4 *Proposed Changes*

The 2025 SWMPP currently requires the City to announce publication of the Annual Report and SWMPP on social media and on the City's digital sign. The sign is unlikely to succeed in motivating the general public to visit the stormwater webpage and download the documents, whereas social media allows for a simple link. The Rainbow City Facebook page currently has approximately 5,800 followers. The City intends to revise the SWMPP to remove the requirement to promote the annual report and SWMPP on the digital sign.

The City of Rainbow City requests no additional changes to the Public Education and Public Involvement strategies identified in the 2025 SWMPP.

### 6.1.5 *Responsible Parties*

The **Building Official** is responsible for overseeing, developing, and coordinating the Public Education and Public Involvement efforts. The **Building Official** is also responsible for providing content for the Storm Water Management webpage and performing plan review regarding erosion, sediment, pollution control, drainage, and flood control.

**RecycleRBC** is responsible for managing recycling activities within the City.

The **City Clerk** is responsible for posting storm water materials on the City's social media accounts.

The **Street Department** is responsible for performing brush pickup and large item pickup.

| 18 | **Program Evaluation:** Utilize collected information to evaluate the effectiveness of the Public Education and Involvement Program. | The Public Education and Involvement Program was evaluated and no changes were deemed necessary. | The City will utilize collected information to evaluate the effectiveness of the public education/public involvement program and to determine changes that may need to be made. | | | NO |
| 19 | **Additional Strategy:** The City entered into an agreement with the City of Southside to support the Southside cardboard recycling program. | Rainbow City personnel removed and recycled cardboard collected using the Southside recycling trailers. | The City will continue to support the City of Southside in their recycling efforts if needed. | A screenshots of Facebook posts by the City of Southside are attached.<br><br>(See Document 1-29) | The City of Southside received an ADEM grant allowing them to purchase their own bailer. Therefore, cardboard will no long need to be transported to Rainbow City. | NO |
| 20 | **Additional Strategy:** Coordinate and/or participate in education activities for school aged children. | Rainbow City personnel conducted a water cycle demonstration and discussed ways to improve/maintain water quality at a middle school afterschool program on **September 5, 2024**.<br><br>Approximately 14 6th through 8th graders were in attendance. | The City will continue to conduct, promote, and participate in stormwater education activities for school aged children. | Photos of the water cycle lesson are attached.<br><br>(See Document 1-30) | | NO |

## 6.2 Illicit Discharge Detection and Elimination

### *6.2.1 Implementation Status*

During the April 1, 2024 to March 31, 2025 reporting period, Rainbow City completed seventeen (17) of the nineteen (19) Illicit Discharge Detection and Elimination strategies identified in the previous Annual Report, the 2022 SWMPP, and the 2025 SWMPP.

The City did not complete one (1) strategy:

- The City did not use the Rainbow City social media accounts to distribute storm water educational highlighting identification and reporting of potential illicit discharges (Strategy 15).

The City partially completed one (1) strategy:

- The City maintained a system for the public to report illicit discharges, but did not promote it on the City's social media (Strategy 16).

A table identifying each Illicit Discharge Detection and Elimination strategy planned for the 2024-2025 reporting period, a description of actions taken by the City of Rainbow City, and a description of activities planned for the next reporting period is provided at the end of this section. Supporting documentation is included in **Appendix E**.

### *6.2.2 Proposed Activities for the April 1, 2025 to March 31, 2026 Reporting Period*

The City will implement the activities listed in the 2025 SWMPP and in Table 6-2 as part of their Illicit Discharge Detection and Elimination Program during the 2025-2026 reporting period. The City will evaluate the success of the program to aid in preparing the required Annual Report based on the evaluation criteria established for each strategy.

### *6.2.3 Assessment of Control*

The strategies enacted during the reporting period appear to be effective in meeting the objectives of the Illicit Discharge Detection and Elimination Control Measure as outlined in the 2021 permit. The strategies are adequate to prevent or correct illicit discharges to the Rainbow City MS4.

### *6.2.4 Proposed Changes*

The City of Rainbow City requests no changes to the Illicit Discharge Detection and Elimination strategies identified in the 2025 SWMPP.

### *6.2.5 Responsible Parties*

The **Building Official** is responsible for overseeing, developing, and coordinating the IDDE program in the Rainbow City regulated MS4 area.

The **City Clerk** is responsible for posting storm water materials on the City's social media accounts.

Other City departments, including the **Public Works Department**, the **Parks and Recreation Department**, the **Building Department**, the **Fire Department**, and the **Police Department**, will report illicit discharges observed during the course of their normal duties. Reports of observed or suspected illicit discharges will be made to the Building Official.

The **Utilities Board of Rainbow City** is responsible for corrective actions regarding Sanitary Sewer Overflows.

The **Fire Department** is responsible for corrective actions regarding hazardous spill response and for reporting spills over 25 gallons to ADEM.

The **Building Department** is responsible for code enforcement involving illegal dumping.

| 19 | **Notify ADEM of Unpermitted Industrial Sites:** Report unpermitted facilities that require an NPDES permit to the Industrial Section of ADEM. | 0 unpermitted facilities reported to ADEM | Unpermitted facilities will be reported to the Industrial Permits Section of ADEM. | | | NO |

## 6.3 Construction Site Storm Water Runoff

### *6.3.1 Implementation Status*

During the April 1, 2024 to March 31, 2025 reporting period, the City of Rainbow City completed fifteen (15) of the sixteen (16) Construction Site Storm Water Runoff strategies identified in the previous Annual Report, the 2022 SWMPP, and the 2025 SWMPP.

The City partially completed one (1) strategy:

- The City maintained a system for the public to report noncompliant construction sites, but did not promote it on the City's social media (Strategy 9).

A table identifying each Construction Site Storm Water Runoff strategy planned for the 2024-2025 reporting period, a description of actions taken by the City of Rainbow City, and a description of activities planned for the next reporting period are provided at the end of this section. Supporting documentation is included in **Appendix F**.

### *6.3.2 Proposed Activities for the April 1, 2025 to March 31, 2026 Reporting Period*

The City will implement the activities listed in the 2025 SWMPP and in Table 6-3 as part of their Construction Site Storm Water Runoff Control Measure during the 2025-2026 reporting period. The City will evaluate the success of the program to aid in preparing the required Annual Report based on the evaluation criteria established for each strategy.

### *6.3.3 Assessment of Controls*

The strategies enacted during the reporting period appear to be effective in meeting the objectives of the Construction Site Storm Water Runoff Control Measure as outlined in the 2021 permit. The strategies are adequate to monitor and control pollutants associated with land disturbing activities.

### *6.3.4 Proposed Changes*

The City of Rainbow City requests no changes to the Construction Site Storm Water Runoff strategies identified in the 2025 SWMPP.

### *6.3.5 Responsible Party*

The **Building Department** is responsible for implementing the Construction Site Storm Water Runoff Control Program.

# Rainbow City

| 12 | **Compliance Order:** Issue a compliance order in the event a construction site continues to violate the terms of the permit if a Written Notice is not followed. | 0 Compliance Orders issued | The City will keep records of any Compliance Orders issued to noncompliant construction sites during the reporting period. | | | NO |
| 13 | **Cease and Desist Order:** Issue a cease and desist order to the owner or operator of a noncompliant construction site if necessary. | 0 Cease and Desist Orders issued | The City will keep records of any Cease and Desist Orders issued to the owner or operator of a noncompliant construction site. | | | NO |
| 14 | **Enforcement Tracking:** Maintain information regarding enforcement actions. Report the number of enforcement actions taken during the reporting period. | 0 enforcement actions undertaken | The City will maintain the name of the owner/operator, the location of the construction project, the description of the violation, the required schedule for returning to compliance, and the description of enforcement response used regarding noncompliant construction sites. | | | NO |
| 15 | **Notify ADEM of Unpermitted Sites:** Notify ADEM of any construction site that is not permitted under to Alabama Construction General Permit. | 0 unpermitted sites reported to ADEM | The City will notify ADEM of any qualifying construction site that is not permitted under the Alabama Construction General Permit. | | | NO |
| 16 | **Notify ADEM of Non-Compliant Sites:** Notify ADEM of non-compliant sites where the City's enforcement actions did not result in compliance. | 0 non-compliant sites reported to ADEM | The City will report noncompliant sites where enforcement actions did not result in compliance. | | | NO |

## 6.4 Post-Construction Storm Water Management in New Development and Redevelopment

### *6.4.1 Implementation Status*

During the April 1, 2024 to March 31, 2025 reporting period, the City of Rainbow City completed twelve (12) of the twelve (12) Post-Construction Storm Water Management strategies identified in the previous Annual Report, the 2022 SWMPP, and the 2025 SWMPP.

A table identifying each Post-Construction Storm Water Management strategy planned for the 2024-2025 reporting period, a description of actions taken by the City of Rainbow City, and a description of activities planned for the next reporting period is provided at the end of this section. Supporting documentation is included in **Appendix G**.

### *6.4.2 Proposed Activities for the April 1, 2025 to March 31, 2026 Reporting Period*

The City will implement the activities listed in the 2025 SWMPP and in Table 6-4 as part of their Post-construction Storm Water Management Control Measure during the 2025-2026 reporting period. The City will evaluate the success of the program to aid in preparing the required Annual Report based on the evaluation criteria established for each strategy.

### *6.4.3 Assessment of Control*

The strategies enacted during the reporting period appear to be effective in meeting the objectives of the Post-construction Storm Water Management Control Measure as outlined in the 2021 permit. The strategies are adequate to address post-construction storm water runoff from new development and re-development.

### *6.4.4 Proposed Changes*

The City of Rainbow City requests no changes to the Post-construction Storm Water management strategies identified in the 2025 SWMPP.

### *6.4.5 Responsible Party*

The **Building Department** is responsible for establishing design criteria for post-construction BMPs, evaluating the storm water ordinance, reviewing submitted Stormwater Management Plans, performing inspections of City-owned post-construction BMPs, and enforcing the provisions of the storm water ordinance.

# Rainbow City

| 12 | **Procedures to Address Non-Compliant Post-Construction BMPs:** Maintain records of escalating enforcement actions of non-compliant post-construction BMPs. | 0 written notices issued | The City will maintain records of enforcement actions regarding post-construction controls during the reporting period. | | | NO |

## 6.5 Pollution Prevention and Good Housekeeping for Municipal Operations

### *6.5.1 Implementation Status*

During the April 1, 2024 to March 31, 2025 reporting period, the City of Rainbow City completed twelve (12) of the thirteen (13) Pollution Prevention and Good Housekeeping for Municipal Operations strategies identified in the previous Annual Report, the 2022 SWMPP, and the 2025 SWMPP.

The City did not complete one (1) strategy:

- The City operated one fueling area, but did not develop a written Standard Operating Procedure for municipal vehicle fueling operations by March 31, 2025 (Strategy 9).

A table identifying each Pollution Prevention and Good Housekeeping for Municipal Operations strategy planned for the 2024-2025 reporting period, a description of actions taken by the City of Rainbow City, and a description of activities planned for the next reporting period is provided at the end of this section. Supporting documentation is included in **Appendix H**.

### *6.5.2 Proposed Activities for the April 1, 2024 to March 31, 2025 Reporting Period*

The City will implement the activities listed in the 2025 SWMPP and in Table 6-5 as part of their Pollution Prevention and Good Housekeeping for Municipal Operations Control Measure during the 2025-2026 reporting period. The City will evaluate the success of the program to aid in preparing the required Annual Report based on the evaluation criteria established for each strategy.

### *6.5.3 Assessment of Control*

The strategies enacted during the reporting period appear to be effective in meeting the objectives of the Pollution Prevention and Good Housekeeping for Municipal Operations Control Measure as outlined in the 2021 permit. The strategies are adequate to address storm water pollution prevention from municipal operations.

### *6.5.4 Proposed Changes*

The City does not store or use pesticides, herbicides, or fertilizers (PHF); therefore, the City intends to revise the 2025 SWMPP to remove the requirement to prepare an SOP for PHF management.

The City does not currently stockpile materials such as soil or gravel; therefore, the City intends to revise the 2025 SWMPP to remove the requirement to prepare an SOP for material storage operations.

The City of Rainbow City requests no additional changes to the Pollution Prevention and Good Housekeeping for Municipal Operations strategies identified in the 2025 SWMPP.

### *6.5.5 Responsible Parties*

The **Building Department** is responsible for conducting the municipal facility evaluations and maintaining records of the facility inspections. The Building Department is also responsible for coordinating the annual reviews of the SOPs.

**RecycleRBC** is responsible for managing recycling activities within the City.

The **Street Department** will be responsible for roadway maintenance and collection and disposal of the waste collected in City-owned or operated BMPs.

# Rainbow City

***Reference Part VI.B.6***

## 7.1 Steering Committee

The Gadsden-Etowah Steering Committee was first established in 2011 following re-issuance of the joint permit. The intent of the steering committee was to provide for coordination between the co-permittees. When the joint permit was superseded by the separate permits in 2016, the committee continued to work together to produce and implement a joint SWMPP and monitoring program.

The Steering Committee will continue under the 2021 permit, although each entity currently operates under individual SWMPPs and the City of Gadsden has discontinued their participation in the joint monitoring program. The cities of Attalla, Glencoe, Hokes Bluff, Rainbow City, and Southside and Etowah County remain committed to partnership and joint implementation of the monitoring program.

Each of the seven entities provides at least one member to the Gadsden-Etowah Storm Water Steering Committee. Each entity is responsible for providing the required annual updates and monitoring data to the Steering Committee.

**Table 7-1 Gadsden-Etowah Storm Water Steering Committee**

There are 1 time periods with multiple data

---

A = 144
B = 18
C = 0
D = 0
E = 16
F = 2
a = 257250
b = 1.0584e+06
c = 4900
Group Variance = 14282.7
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 196.577
M1 = (1224 - 196.577)/2.0 = 513.712
M2 = (1224 + 196.577)/2.0 + 1 = 711.288
Lower limit is -0.145 = Q(514)
Upper limit is -0.0227273 = Q(711)
**-0.0227273 < 0 indicating a  downward trend in data.**

## Sen's Slope Analysis
### Parameter: Total Suspended Solids
### Location: GD 6
**Original Data (Not Transformed)**
**Non-Detects Replaced with Detection Limit**

90% Confidence Level

| Xj | Xk | (Xj - Xk)/(j-k) | Q |

There are 0 time periods with multiple data

---

A = 174
B = 0
C = 6
D = 0
E = 18
F = 0
a = 142680
b = 575640
c = 3280
Group Variance = 7917
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 146.355
M1 = (820 - 146.355)/2.0 = 336.823
M2 = (820 + 146.355)/2.0 + 1 = 484.177
Lower limit is -0.0173913 = Q(337)
Upper limit is 0.12 = Q(484)
-0.0173913 < 0 < 0.12 indicating no trend in data.

## Sen's Slope Analysis

### Parameter: Total Suspended Solids

### Location: HB 3

**Original Data (Not Transformed)**

**Non-Detects Replaced with Detection Limit**

90% Confidence Level

A = 108
B = 0
C = 0
D = 0
E = 12
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13452.7
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.779
M1 = (1176 - 190.779)/2.0 = 492.61
M2 = (1176 + 190.779)/2.0 + 1 = 684.39
Lower limit is -0.24878 = Q(493)
Upper limit is 0.188571 = Q(684)
-0.24878 < 0 < 0.188571 indicating no trend in data.

## Sen's Slope Analysis

### Parameter: Total Suspended Solids

### Location: RC 14

**Original Data (Not Transformed)**

**Non-Detects Replaced with Detection Limit**

90% Confidence Level

A = 72
B = 0
C = 0
D = 0
E = 8
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13454.7
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.793
M1 = (1176 - 190.793)/2.0 = 492.603
M2 = (1176 + 190.793)/2.0 + 1 = 684.397
Lower limit is -0.0428571 = Q(493)
Upper limit is 0.333333 = Q(684)
-0.0428571 < 0 < 0.333333 indicating no trend in data.

## Sen's Slope Analysis
### Parameter: Total Suspended Solids
### Location: RC 2

F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13453.7
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.786
M1 = (1176 - 190.786)/2.0 = 492.607
M2 = (1176 + 190.786)/2.0 + 1 = 684.393
Lower limit is -0.090625 = Q(493)
Upper limit is 0.0875 = Q(684)
-0.090625 < 0 < 0.0875 indicating no trend in data.

## Sen's Slope Analysis
### Parameter: Total Suspended Solids
### Location: SME 1
**Original Data (Not Transformed)**
**Non-Detects Replaced with Detection Limit**

90% Confidence Level

There are 0 time periods with multiple data

---

A = 90
B = 0
C = 0
D = 0
E = 10
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13453.7
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.786
M1 = (1176 - 190.786)/2.0 = 492.607
M2 = (1176 + 190.786)/2.0 + 1 = 684.393
Lower limit is -0.176471 = Q(493)
Upper limit is 0.0666667 = Q(684)
-0.176471 < 0 < 0.0666667 indicating no trend in data.

## Sen's Slope Analysis

### Parameter: Total Suspended Solids

### Location: SS 13

**Original Data (Not Transformed)**

**Non-Detects Replaced with Detection Limit**

A = 120
B = 0
C = 6
D = 0
E = 12
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13452
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.775
M1 = (1176 - 190.775)/2.0 = 492.613
M2 = (1176 + 190.775)/2.0 + 1 = 684.387
Lower limit is -0.0348 = Q(493)
Upper limit is 0.142857 = Q(684)
-0.0348 < 0 < 0.142857 indicating no trend in data.

## Sen's Slope Analysis
### Parameter: Total Suspended Solids

There are 0 time periods with multiple data

---

A = 420
B = 0
C = 66
D = 0
E = 32
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13435.3
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.656
M1 = (1176 - 190.656)/2.0 = 492.672
M2 = (1176 + 190.656)/2.0 + 1 = 684.328
Lower limit is -0.105882 = Q(493)
Upper limit is 0.046 = Q(684)
-0.105882 < 0 < 0.046 indicating no trend in data.

## Sen's Slope Analysis

### Parameter: Total Suspended Solids

### Location: SS 5

**Original Data (Not Transformed)**

**Non-Detects Replaced with Detection Limit**

90% Confidence Level

| Xj | Xk | (Xj - Xk)/(j-k) | Q |

A = 948
B = 0
C = 222
D = 0
E = 56
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13406
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.448
M1 = (1176 - 190.448)/2.0 = 492.776
M2 = (1176 + 190.448)/2.0 + 1 = 684.224
Lower limit is -0.0586207 = Q(493)
Upper limit is 0.0625 = Q(684)
-0.0586207 < 0 < 0.0625 indicating no trend in data.

## Sen's Slope Analysis

Sen's Estimator (Median Q) is -0.0375

| Time Period | Observations |
|---|---|
| 12/17/2020 | 1 |
| 3/18/2021 | 1 |
| 5/5/2021 | 1 |
| 11/23/2021 | 1 |
| 1/11/2022 | 1 |
| 4/7/2022 | 1 |
| 8/2/2022 | 1 |
| 11/16/2022 | 1 |
| 2/14/2023 | 1 |
| 5/25/2023 | 1 |
| 8/7/2023 | 1 |
| 12/12/2023 | 1 |
| 1/10/2024 | 1 |
| 5/21/2024 | 1 |
| 9/16/2024 | 1 |
| 12/11/2024 | 1 |
| 2/18/2025 | 1 |

There are 0 time periods with multiple data

A = 0
B = 0
C = 0
D = 0
E = 0
F = 0
a = 10608
b = 36720
c = 544
Group Variance = 589.333
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 39.9308
M1 = (136 - 39.9308)/2.0 = 48.0346
M2 = (136 + 39.9308)/2.0 + 1 = 88.9654
Lower limit is -0.833333 = Q(48)
Upper limit is 0.825 = Q(89)
-0.833333 < 0 < 0.825 indicating no trend in data.

## Sen's Slope Analysis
### Parameter: Total Suspended Solids
### Location: SME 5
**Original Data (Not Transformed)**
**Non-Detects Replaced with Detection Limit**

90% Confidence Level

| Xj | Xk | (Xj - Xk)/(j-k) | Q |

There are 0 time periods with multiple data

A = 36
B = 0
C = 0
D = 0
E = 4
F = 0
a = 12546
b = 44064
c = 612
Group Variance = 695
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 43.363
M1 = (153 - 43.363)/2.0 = 54.8185
M2 = (153 + 43.363)/2.0 + 1 = 99.1815
Lower limit is -1.235 = Q(55)
Upper limit is 0.146667 = Q(99)
-1.235 < 0 < 0.146667 indicating no trend in data.

## Sen's Slope Analysis
### Parameter: Total Suspended Solids
### Location: SME 6
**Original Data (Not Transformed)**
**Non-Detects Replaced with Detection Limit**

90% Confidence Level

There are 0 time periods with multiple data

---

A = 0
B = 0
C = 0
D = 0
E = 0
F = 0
a = 12546
b = 44064
c = 612
Group Variance = 697
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 43.4254
M1 = (153 - 43.4254)/2.0 = 54.7873
M2 = (153 + 43.4254)/2.0 + 1 = 99.2127
Lower limit is -0.67 = Q(55)
Upper limit is 3.41111 = Q(99)
-0.67 < 0 < 3.41111 indicating no trend in data.

## Sen's Slope Analysis
### Parameter: Total Suspended Solids
### Location: SME 7

There are 0 time periods with multiple data

---

A = 66
B = 0
C = 6
D = 0
E = 6
F = 0
a = 3828
b = 11880
c = 264
Group Variance = 209
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 23.7794
M1 = (66 - 23.7794)/2.0 = 21.1103
M2 = (66 + 23.7794)/2.0 + 1 = 45.8897
Lower limit is 0 = Q(21)
Upper limit is 0.9975 = Q(46)
0 < 0 < 0.9975 indicating no trend in data.

## Sen's Slope Analysis

There are 1 time periods with multiple data

---

A = 246
B = 18
C = 24
D = 0
E = 22
F = 2
a = 257250
b = 1.0584e+06
c = 4900
Group Variance = 14277
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 196.538
M1 = (1224 - 196.538)/2.0 = 513.731
M2 = (1224 + 196.538)/2.0 + 1 = 711.269
Lower limit is -0.00234483 = Q(514)
Upper limit is 0.00393548 = Q(711)
-0.00234483 < 0 < 0.00393548 indicating no trend in data.

There are 0 time periods with multiple data

---

A = 84
B = 0
C = 6
D = 0
E = 8
F = 0
a = 142680
b = 575640
c = 3280
Group Variance = 7922
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 146.401
M1 = (820 - 146.401)/2.0 = 336.799
M2 = (820 + 146.401)/2.0 + 1 = 484.201
Lower limit is 0 = Q(337)
Upper limit is 0.0105135 = Q(484)
0 < 0 < 0.0105135 indicating no trend in data.

There are 0 time periods with multiple data

---

A = 834
B = 0
C = 210
D = 0
E = 46
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13412.3
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.493
M1 = (1176 - 190.493)/2.0 = 492.753
M2 = (1176 + 190.493)/2.0 + 1 = 684.247
Lower limit is -0.0075 = Q(493)
Upper limit is 0 = Q(684)
-0.0075 < 0 < 0 indicating no trend in data.

## Sen's Slope Analysis
### Parameter: TKN
### Location: RC 14
**Original Data (Not Transformed)**
**Non-Detects Replaced with Detection Limit**

90% Confidence Level

There are 0 time periods with multiple data

---

A = 420
B = 0
C = 66
D = 0
E = 32
F = 0
a = 242256
b = 994896
c = 4704
Group Variance = 13435.3
For 90% confidence interval (two-tailed), Z at (1-0.9)/2 = 1.64485
C = 190.656
M1 = (1176 - 190.656)/2.0 = 492.672
M2 = (1176 + 190.656)/2.0 + 1 = 684.328
Lower limit is -0.00341379 = Q(493)
Upper limit is 0.00374286 = Q(684)
-0.00341379 < 0 < 0.00374286 indicating no trend in data.
